Adams is bringing fiber to YOUR home!

Join Adams and Follow the Fiber!

The Benefits of Fiber

Increased Reliability

Fiber optic cable is less susceptible than copper cable to issues caused by weather, electrical interference, or other outside sources.

Faster High-Speed Internet Possibilities

Increased bandwidth on fiber optic cable allows for the possibility of higher download and upload speeds. Adams technicians will install the necessary equipment to keep your Internet working.

Increased Bandwidth Capabilities for the Future

Fiber's ability to carry large amounts of data allows Adams to stay on the cutting edge as technology evolves. Adams Fiber allows for the versatility to be ready to implement new services and features that benefit our customers, quickly and efficiently.

Increased Home Value

A recent study shows that fiber to the home will increase a home's value between \$4,000 and \$7,000.

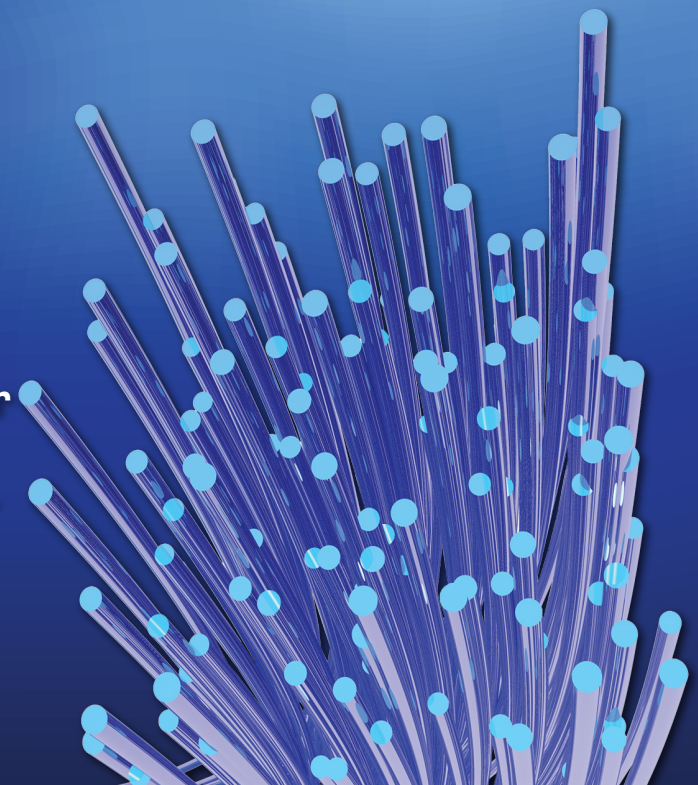

You'll enjoy:

No Gimmick Pricing

High-speed Internet up to a Gigabit

Future Proof Technology for Entertainment, Security, Communication, and more.

Increased Property Value

Welcome to the Future of Communication- Adams Fiber is Coming!

What is Fiber?

Fiber optic cable is made up of a bundle of small strands of glass that use light instead of electricity to carry data. Data travels over fiber much like copper cable, except fiber offers a vast amount of bandwidth for delivery of cutting edge service.

How does Adams Fiber benefit Quincy?

As with any utility, having the most capable and reliable infrastructure provides more value to the community and its residents. Connecting Quincy with fiber brings big benefits. Having the option for this much capacity attracts businesses that require large amounts of bandwidth for their operations. This may be the same case for residential customers. Customers are constantly needing and demanding higher amounts of bandwidth in their homes. This fiber investment prepares us all for what's to come in the future.

For over 60 years, Adams has provided the area with the best in telecommunications services.

Find out about the many benefits of Adams Fiber and the other services we offer!

Contact us at 217 - 214 - FIBER (3423) or at fiber@adams.net.

What services can be delivered over Adams Fiber?

- High-speed Internet service up to Gigabit speeds
- Telephone (keep your current phone number)
- TV
- Bundled packages available

Is this the first time Adams has offered fiber in our area?

No, Adams has offered fiber to many of our communities in the area since 2007. For over nine years, Adams has also provided fiber to the majority of businesses in Quincy. Now you can receive the same speeds at home as you do at your office.

What's better: Fiber, cable Internet (broadband), DSL, or wireless Internet?

Fiber is by far the best internet option on the market today. Fiber Internet is not shared and provides the greatest speeds to enhance your experience. This is the same technology that Google is launching in large cities around the US. They currently are in the process of launching in Kansas City, Mo.; Provo, UT.; and Austin, TX. Adams is excited to bring this state-of-the-art technology to Quincy.

What if I am currently a customer of Adams and have DSL or wireless service?

Current DSL or wireless customers can be moved over to fiber. Contact Adams customer service to help transition your plan.

Our Launch Plan:

Adams Fiber team will announce neighborhoods where the fiber will first be launched. They will meet with the "potential Fiberhoods" to determine interest. Once the neighborhood has met the pre-registration goal and the construction deposits of \$50 per home have been paid, construction will begin. If you sign up and pay your construction deposit during pre-registration, Adams will match your \$50, which will be applied as a credit towards your installation or future bill.

We will update our website followthefiber.net with the status of the project by Fiberhood. If your neighborhood is interested in becoming the next Fiberhood, please contact us. Your interest will help direct our next areas within the city.

Download Speed (times are approximate)	1,000 Mbps Gigabit	100 Mbps	50 Mbps	30 Mbps	10 Mbps
Photo (1 MB JPEG)	Instant	Instant	Instant	Instant	11 seconds
iTunes Music (4.5 MB MP3)	Instant	Instant	Instant	1 second	3 second
Full Length HD Movie (8 GB)	1 minute	10 minutes	21 minutes	33 minutes	2 hours
